

Section 4 Minimum System Req. and Compatibility

The Pro Flight Trainer is a Plug&Play unit that works with any HID compatible system. 99% of today's operating system includes HID compatibility.

You can use it for every software that supports USB inputs. This also means that you could use it for car racing games and platform games, even if it doesn't seem to make sense ;-). Our suggestion is to use it for Flight Simulation purposes ;-)...

Any Well-known Simulation software is supported. Including but not limited to FS series, FS2004, FSX, FSX-SE, all Combat Simulator Series, Flight, X-plane Series, DCS Black Shark, ARMA Series, VBS Series, Take on Helicopter, etcetera

4.1.1 PC Hardware/operating system requirements:

PC Pentium 200MHz or higher with USB port

Microsoft Windows® 98, Me, 2000, XP, Vista, Windows 7, Windows 8, Windows 8.1, Windows 10 and more recent edition of windows 32 and 64 bit

DirectX® 7.0 compatible.

MACMac® or iMac™ with USB port

Mac OS 10.3 Panther or more recent

Linux OS 8.2 or more recent

Input Sprocket 1.5 or more recent with USB Port

NOTE!

These requirements are for the Pro Flight Trainer. Make sure to refer to the manufacturer for the simulation software requirements!!!
